End Application:

Spacelift range, western range transmission network

Emission Type:

A3j

Operating Frequency:

Between 2.000 megahertz and 30.000 megahertz

Special Features:

The vafb hf receiver system uses collins 651f-1 hf ssb/am receivers with a frequency range of 2 to 30mhz and 17 different antennas to provide the required frequencies, the vafb rx provides a link between ships, aircraft and range control elements in the missile flight path

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T199-c
