**End Application:**

Spacelift range, western range transmission network

**Emission Type:**

A3j

**Operating Frequency:**

Between 2.000 megahertz and 30.000 megahertz

**Special Features:**

The vafb hf receiver system uses collins 651f-1 hf ssb/am receivers with a frequency range of 2 to 30mhz and 17 different antennas to provide the required frequencies, the vafb rx provides a link between ships, aircraft and range control elements in the missile flight path

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T199-c
