End Application:

Eastern range, communications/timing

Special Features:

Remote timing: timing systems located within range instrumentation and range user sites synchronized with central timing and sometimes referred to as 'clock distribution systems' (cds), this system is used to strip put discrete clock codes to user equipment such as crypto, modems, microwave, data recorders and other such equipment used to process data that is time code sensitive

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
