Overall Length:

48.000 inches

Overall Height:

24.000 inches

Overall Width:

27.000 inches

End Application:

Used with: td-1428/u time standard module

Voltage In Volts And Current Type:

115.0 ac

Special Features:

Consists of: 622-7225-00 (13499) atomic frequency time reference, 622-7223-003(13499) time standard module receptacle, an/cyz-10 & on477400-1(98230) data transfere device, g611453-1(49956) laptop computer & printer(tempest rated) , various cases, cables, & manuals

Functional Description:

Provides the transportable capabiity for milstar system to maintain an accurate time-of-day (tod) synchronized coordinated universal time, also provides for storage of variable data which is input through the laptop computer & printer

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
