Overall Length:

2.500 inches

Overall Height:

6.500 inches

Overall Width:

2.000 inches

Electrical Power Source Relationship:

Operating

Internal Battery Accommodation:

Included

Installation Design:

Airborne

Output Frequency Rating:

121.500 megahertz and 243.000 megahertz

Transmitter Emission Type:

F9

Vehicle For Which Designed:

Helicopter

Special Features:

Unit is operational-both automatically and manually

Functional Description:

Automatic helicopter emergency locator transmitter

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T199-d
