General Description:

Rbm interfaces with the receive terminal to receive transponder streams, the streams are then decryped, if necessary, into appropriate componentdata and video streams & files that are routed to user systems. The system tracks, receives, amplifies, and down converts signals from satellites and routes them to the receive broadcast manager (rbm)

Fsc Application Data:

Gbs

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

A23900
