General Description:

Rbm interfaces with the receive terminal to receive transponder streams. The streams are then decrypted, if necessary into appropriate component data and video streams & files that are routed to user systems. The systemtracks, receives, amplifies, and down converts signals from satellites and routes them to the rbm

Fsc Application Data:

Gbs

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

A23900
