**General Description:**

Rbm interfaces with the receive terminal to receive transponder streams. The streams are then decrypted, if necessary into appropriate component data and video streams & files that are routed to user systems. The systemtracks, receives, amplifies, and down converts signals from satellites and routes them to the rbm

**Fsc Application Data:**

Gbs

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fiig:**

A23900
