End Application:

5895-01-522-9583; 5895-01-522-9993, terminal, satellite communication

Product Name:

Xli saasm gps (time and frequency) receiver

Special Features:

Compliant with joint chiefs of staff 2006 saasm gps mandate; for authorized military users only; generates precision time and frequency signals for high bandwidth mission critical communications systems requiring highest security support; authenticates satellite signals (when keyed) with anti-spoofing (a-s) technology; corrects for selective availability (sa) if enabled; dual frequency is received on both the I1 and I2 bands; supports encrypted and unclassified (controlled) black keys; decryption of black keys takes place within saasm module; classified red keys are also supported; provides immunity to jamming; configuration software automatically detects unit setup at power-on providing "plug-and-play" configuration capability for current and future application needs.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T199-d
