**Product Name:**

Radio transmitter receiver unit

**Special Features:**

Receiver/transmitter unit for the joint tactical radio system enhanced multiband inter/intra team radio (jem), an/prc-148 urban version v6, provides military teams with the ability to communicate on a user-selected frequency from 30 to 512 megahertz (mhz) utilizing a single handheld radio. It includes national security agency (nsa)-endorsed embedded communications security (comsec). The jem radio operates in both military and public service frequency bands, on a rechargeable battery pack or commercial batteries, has a selectable power output up to five watts, is night vision goggles (nvg) compatible, and includes a built-in test (bit) capability. The urban version v6 is capable operating after immersion in 6 feet of water for 30 minutes. An internal microphone/speaker with the urban version capable of enhanced audio fidelity and integrated waveform capability distinguishes this radio from v1 and v2 mbitr variants.

**Supplementary Features:**

THER-EC-EIV-ER/T

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fiig:**

T199-d
