Design Type:

Rotatable

Component Controlling Agency:

Computer controlled via rs-232 or rs-485 interface

Control Type:

Level or tilt

Rotation In Deg:

360.0

Special Features:

Payloads to 35 pounds verticle mount and 70 pounds horizontal mount; tilt range is from minus 30 degrees to 90 degrees straight up; pan speed up to 50 degrees per second; 355 degrees pan unles in continous pan which is 360 degrees

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T150-g
