Overall Length:

12.500 inches

Overall Height:

3.250 inches

Overall Width:

3.375 inches

Mounting Configuration:

Three no. 8 mtg screws on 2-1/8 in. By 8-13/16 in.

Product Name:

Receiver subassembly

Special Features:

Differs from r-568/arc-34 in that parts with increased reliability are utilized, connectors are relocated and voltages are brought in on different pins; consists of: electron tube 10; capacitor 49; resistor 37; coil, rf 10; oscillator, crystal 1; stage unit 8; tuned circuit 4; jetds number: mx-3552/arc-34b

Fsc Application Data:

Radio set, communication, airborne

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511I0
