Dc Voltage Rating:

28.0 volts

Frequency Rating:

50.0 hertz

End Application:

Agm-86b missile

Operating Frequency:

Between 2255.500 megahertz and 1500.000 kilohertz

Special Features:

Power output: 2watts min.; amplitude modulation; 10 pct or less; operational life: 500 hours; temperature range: m65.0 deg.F to p 185.0deg.F; pressure level: 0.82/15.5 psia captive flight, 2.14/15.4 psia free flight; used on telemetry system for an airborne vehicle

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T199-c
