Overall Length:

5.000 inches

Overall Height:

0.625 inches

Overall Width:

4.750 inches

End Application:

An/arc-18 (v) uhf radio

Electrical Power Source Relationship:

Operating

Receiver Channel Quantity:

1

Installation Design:

Airborne

Input Frequency Rating:

243.000 megahertz

Guard Channel:

Included

Auxiliary Bandsread Tuning Feature:

Not included

Plug-in Tuning Unit:

Not included

Special Features:

Consists of housing 1; cca 1; slice shield 1; various hardware

Functional Description:

Emergency guard channel, fixed signal conversion superheterdyne rcr; tuned to 243.0 mhz guard channel, am only; pwr rqmt p12/m12/p27.5 vdc

Fsc Application Data:

Pn90071-801, 5821-01-217-3747, rt-1571 receiver transmitter

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T199-d
