End Application:

Used on c130-h aircraft

Basic Shape Style:

Rectangular or square

Installation Design:

Module

Circuit Construction Type:

Solid state

Impedance Rating Per Channel:

75.000 ohms operating channel

Connection Type And Location:

Pressurized coaxial plug bottom

External Dc Operating Voltage In Volts:

15.0 single voltage

Special Features:

Composite and y/c to rgb and component decoder; 3 line adaptive digital comb filter elims cross color, luma, dot crawl and provides 6 db chroma noise reduction

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A32200
