Overall Length:

7.680 inches

Overall Height:

3.000 inches

Overall Width:

5.700 inches

Dc Voltage Rating:

28.0 volts

End Application:

Used on cargo utility helicopters

Receiver Channel Quantity:

6

Special Features:

Digital cargo utility gps receiver; 6 channel; night vision goggle compatible; reprogrammable infield software; continuous tracking; omnidirectional antenna; op temp m55/p70 degrees c; measures aircraft speed, position; manages navigation, bearing, distance etc; standard position service, no py mode

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T199-d
