Overall Length:

13.100 inches

Overall Height:

12.200 inches

Overall Width:

5.300 inches

Dc Voltage Rating:

28.0 volts

Joint Electronics Type Designation System Item Name:

Transmitter, radio

Joint Electronics Type Designation System Item Type Number:

T-1199/trn-30v

Internal Battery Accommodation:

Included

Transmitter Band Quantity:

2

Transmitter Channel Quantity:

964

Power Output:

25.000 watts

Channel Frequency Separation:

0.5 kilohertz

Output Frequency Rating:

Between 200.000 kilohertz and 535.000 kilohertz and 1.605 megahertz and 1.750 megahertz

Frequency Control Type:

Synthesized

Fixed Crystal Quantity:

1

Transmitter Emission Type:

A2

Special Features:

Jetds; beacon set, radio; type no. An/trn-30v1, an/trn-30v2

Fsc Application Data:

Beacon sets, radio navigation, nonairborne

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T199-d
