Maximum Power Dissipation Rating:

100.0 watts

Accessory Component Quantity:

7

Furnished Items:

Receiver-transmitter, radio; support assembly, antenna; filter direct current power; compass; monitor, azimuth; support, monitor; antenna

Joint Electronics Type Designation System Item Name:

Navigational set, tacan

Joint Electronics Type Designation System Item Type Number:

An/trn-41

Internal Battery Accommodation:

Not included

Receiver Frequency Rating:

Between 962.0 megahertz and 1213.0 megahertz

Transmitter Frequency Rating:

Between 962.0 megahertz and 1213.0 megahertz

Special Features:

2operates as a lightweight portable, tactical air navigation system designed to provide navigational aid to assist aircraft in locating landing zones, drop zones, or extraction zones; can be deployed in a manportable/airdroppable configuration
