Overall Length:

10.500 inches

Overall Height:

9.000 inches

Overall Width:

9.000 inches

Ac Voltage Rating:

115.0 volts

Frequency Rating:

Between 108.1 megahertz and 111.9 megahertz

Electrical Power Source Relationship:

Operating

Internal Battery Accommodation:

Not included

Input Frequency Rating:

25.100 megahertz

Receiver Emission Type:

A3 and ao

Guard Channel:

Not included

Auxiliary Bandsread Tuning Feature:

Not included

Plug-in Tuning Unit:

Not included

Phase:

Single

Special Features:

Zpowered by 10 rechargeable batteries, will recharge full in 16 hours, receiver is contained in a weatherproof case, receiver is used to measure signals of an ils localizer or glide slope facility, part of portalbe ils receiver set, fa9743

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T199-d
