Maximum Power Dissipation Rating:

300.000 watts

End Application:

An/trn-45

Installation Design:

Transportable

Emission Type:

F0 receiving

Special Features:

8 ft max; 600 lbs max; consists of: 1 azimuth antenna; 2 electronic unit controls; 1 distance measuring equipment unit; 1 elevation antenna; 1 remote control and display unit; 3 storage batteries

Functional Description:

Used to provide a precision approach guidance system that will provide a landing capability for operations in all weather

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T198-b
