Overall Length:

3.500 inches

Overall Height:

6.300 inches

Overall Width:

1.809 inches

Electrical Power Source Relationship:

Alternate operating

Transmitter Band Quantity:

2

Installation Design:

Portable

Output Frequency Rating:

Between 390.0 megahertz and 470.0 megahertz

Product Name:

Trimble tdl 450l radio

Special Features:

User interface 2row, 16 character lcd display with 5 navigation buttons rf transmitter output programmable to 0.1 to 4w (were permitted) sensitive (-110 dbm ber 100000), data/power connection

Functional Description:

Designed to support all aspect of gnss surveying, this instrument offersflexible configuration options and rugged reliability. This sophisticated 100mw to 4.0w radio modem places trimble's newest low power data link technologyin your hands

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T199-d
