Ac Voltage Rating:

27.0 volts

Dc Voltage Rating:

27.0 volts

Frequency Rating:

400.0 hertz

End Application:

A-10a

Electrical Power Source Relationship:

Operating

Internal Battery Accommodation:

Not included

Installation Design:

Airborne

Emission Type:

A9b

Operating Frequency:

Between 100.000 megahertz and 400.000 megahertz

Vehicle For Which Designed:

Aircraft

Phase:

Single

Special Features:

Used with arc-27, arc-34, arc-52, arc-51, arc-84, arc-109, arc-116, arc-150, arc-159, arc-164, arc-160, 718m-1/2/3, arc-186 and arc-182; same mount as as-909/ara-48-5; c/o 1 ea radome pn 780-9670-001; 1 ea chassis, wired p/n 780-8963-004; 1 ea assembly, cover p/n 780-8962-003

Supplementary Features:

3.6 in high, 12.38 in wide

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T199-c
