Dc Voltage Rating:

8.2 volts

End Application:

Multi-aircraft

Electrical Power Source Relationship:

Operating

Internal Battery Accommodation:

Included

Installation Design:

Portable

Emission Type:

P9

Channel Quantity:

1

Operation Method:

Automatically triggered or independent

Operating Frequency:

243.000 megahertz

Vehicle For Which Designed:

Any acceptable

Type/model Designation:

An/urt-33d/m

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T199-c
