End Application:

60173-640-03 (12763) smart term box rb6

Product Name:

Assy mic control station type ic/msb 2 (dias config.)

Special Features:

Microphone control station (msb-2) to be used with dias (dynalec integrated announcing system); the primary difference between this station and the traditionally used on 60173-000 is that the busy light circuit previously driven by 115vac has been modified for the 5vdc busy signal provided by the dias

Functional Description:

Microphone control station
