Special Features:

Shelf Life:

T20100

The c4ops is a 20m immersible software defined, tactical hearing protection/hearing enhancement headset system. The modularity of the system enables the operator to use a variety of headset configurations based on the operational profile. The c4ops control box headset lead includes a quick disconnect connector that allows the attachment of various headset configurations. The c4ops control box includes 3 radio/intercom leads (primary, secondary, auxiliary)
