Station Quantity:

5

Electrical Transmission Type:

Wireless

Joint Electronics Type Designation System Item Name:

Interphone equipment

Joint Electronics Type Designation System Item Type Number:

An/aic-3

Usage Design:

Outdoor

Functional Description:

Provides intercommunication between 2 to 5 stations, unlimited mixing of audio outputs of several radio sets, radio receivers and other facilities required for transport aircraft

Reference Number Differentiating Characteristics:

Modified for use as test and/or calibration bench mock-up equipment

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T20100
