**Dc Voltage Rating:**

27.4 volts

**All Station Position:**

Not included

**Amplifier:**

Included

**Electrical Transmission Type:**

Wire

**Joint Electronics Type Designation System Item Name:**

Intercommunication station

**Joint Electronics Type Designation System Item Type Number:**

Ls-460a/aic

**Electrical Power Source Relationship:**

Operating

**Usage Design:**

Indoor

**Functional Description:**

Provides intercockpit communication, receiver monitoring, pulse decoder monitoring, tail warning radar monitoring and radio transmitter microphone controls

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

T20100
