**Overall Length:**

7.000 inches

**Overall Width:**

5.750 inches

**End Application:**

Ta-1038/a; e-8a aircraft; joint stars

**Criticality Code Justification:**

Feat

**Component Type And Quantity:**

2 diode and 14 screw and 11 washer

**Special Features:**

Front panel assembly 1, front panel logic assembly 1, cable assembly 1, display assembly 1, illuminated panel 1, elapsed time meter 1, built-in test indicator 2, toggle switches 2; controls intercom station; submitted as front enclosure assembly, ct-electrostatic discharge sensitive

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A5110
