Overall Length:

7.000 inches

Overall Width:

5.750 inches

End Application:

Ta-1038/a; e-8a aircraft; joint stars

Criticality Code Justification:

Feat

Component Type And Quantity:

2 diode and 14 screw and 11 washer

Special Features:

Front panel assembly 1, front panel logic assembly 1, cable assembly 1, display assembly 1, illuminated panel 1, elapsed time meter 1, built-in test indicator 2, toggle switches 2; controls intercom station; submitted as front enclosure assembly, ct-electrostatic discharge sensitive

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A5110
