Overall Length:
7.000 inches
Overall Width:
5.750 inches
End Application:
Ta-1038/a; e-8a aircraft; joint stars
Criticality Code Justification:
Feat
Component Type And Quantity:
2 diode and 14 screw and 11 washer
Special Features:
Front panel assembly 1, front panel logic assembly 1, cable assembly 1, display assembly 1, illuminated panel 1, elasped time meter 1,
built-in test indicator 2, toggle switches 2; controls intercom station; submitted as front enclosure assembly, ct-electrostatic discharge
sensitive
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
A511I0
