Maximum Voltage Rating In Volts:

28.0 dc

End Application:

Airborne inter communication switch

Power Source:

External

Special Features:

Microprocessor-based display and control unit which provides an operator an interface to, and control of, the intercommunication system; receives display from/transmits switch data to external equipment; line replaceable unit containing display/associated electronics; illuminated switch panel; microcomputer system; rs-422 serial interface; power supply

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A31700
