Diameter:

0.0036 inches

Dc Voltage Rating:

28.0 volts

Frequency Response Range In Hertz:

+200.0/+5000.0

Input Impedance Rating In Ohms:

100.0 and 600.0

Joint Electronics Type Designation System Item Name:

Recorder set, sound

Joint Electronics Type Designation System Item Type Number:

An/anh-2

Electrical Power Source Relationship:

Operating

Case:

Not provided

Recording Method:

Magnetic

Recording Medium For Which Designed:

Wire

Input Channel Quantity:

2

Functional Description:

Provides for recording from carbon microphones and intercom sets or radio sets while airborne. Playback is provided on a separate ground operated set (an/gnq-14)

Reference Number Differentiating Characteristics:

Modified for use as bench test set

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T207-a
