Overall Length:

21.000 inches

Overall Height:

16.000 inches

Overall Width:

20.000 inches

Component Quantity:

2

Locking Device:

Not included

Component Controlling Agency:

Jcens

Component Name:

Recorder-reproducer sub-assembly; amplifier power supply

Component Identifying Number:

Am-1251/thn-2a type no. And rd-146/thn-2a type no.

Handle Quantity:

2

Handle Location:

Each side

Special Features:

Case is split diagonally and is hinged and held in place w/latch fasteners, exterior of case is wood skidded

Material:

Aluminum

Surface Treatment:

Enamel

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T358-a
