Overall Length:

10.500 inches

Ac Voltage Rating:

120.0 volts

End Application:

Rd-674c/unh, recorder/reproducer

Electrical Power Source Relationship:

Operating

Usage Design:

Communication

Case:

Provided

Recording Method:

Electromechanical

Recording Medium For Which Designed:

Disk

Input Channel Quantity:

32

Amplifier Output Rating In Watts:

220.0

Special Features:

Inavy)digital voice logger; 233mhz pentium controller; tmss320c31 dsp chip processor; memory 64mb on i/o card, 64mb on the processor card; touch screen; five 5.2gb removable optical disk

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T207-a
