Terminal Quantity:

2

Overall Depth:

21.750 inches

Overall Height:

9.625 inches

Overall Width:

16.725 inches

Frequency Response Tolerance In Decibels:

-3.0/+3.0

Frequency Response Range In Hertz:

+50.0/+15000.0

Function For Which Designed:

Video recorder and video reproducer

Recording Medium For Which Designed:

Tape

Voltage In Volts:

100.0 and 120.0

Supplementary Features:

Opr temp: 41 to 104 degrees f; storage temp: m4 to m140 degrees f; video o/p: ntsc composite, 1.0v p-p porm .2v 75 ohms; the editor adopts a plug-in time base corrector, a plug-in digital noise reducer, a built-in time code reader, & dial operation concept, which allows the display of time code, self-diagnostic results, setting various vtr modes & the use of simple search dial operations, which can be done while viewing the monitor or led time counter

Fsc Application Data:

Closed circuit tv

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T207-b
