Overall Length:

26.000 inches

Overall Height:

14.000 inches

Overall Width:

19.000 inches

Ac Voltage Rating:

Frequency Rating:

400.0 hertz

End Application:

An/avy-2; joint stars operation & control subsystem

Joint Electronics Type Designation System Item Name:

Recorder-reproducer set, militarized disk

Joint Electronics Type Designation System Item Type Number:

An/uyl-1 (v) 2

Electrical Power Source Relationship:

Alternate operating

Phase:

Three

Special Features:

4 disk controllers; small computer system interfac (scsi) ; rack mounted

Functional Description:

Provides for processing, recording & reading digital data through the scsi input/output channels, hosts up to 4 disks

Reference Number Differentiating Characteristics:

As differentiated by source controlled

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T207-a
