Current Type:

Ac

End Application:

Radar transmit set

Voltage In Volts:

100.0

Special Features:

9submitted as 'mav 168 video switch'; 150mhz (-3db) video bandwidth, fully loaded; video genlock and vertical interval switching; quad std; balanced/unbalanced audio; input audio gain and attenuation; audio breakaway; quickswitch front panel controller (qs-fpc); front panel i/o label windows; view i/o mode; global presets; rs-232/422 control; simple instruction set (sis); control software; mcp1000 & mkp 1000 cmicroprocessor controlled; front panel security lockout; internal international power supply

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T142-q
