Overall Length:

25.0 inches

Overall Height:

24.0 inches

Overall Width:

36.0 inches

Recording Method:

Digital

Special Features:

Contains multiple color and black and white cameras, lenses, camera power supplies, audio and video cables and connectors, portable digital video recording device, sting ii recorder, two transmitters (one low and one high power), and one receiver. The edges on the e-series rx/tx units were rounded so they the units were easier to handle and had no sharp corners. The imbedded led was added because they kept breaking the older lcd rssi meters (because they extruded from the chassis). The finish was changed to gold iridite from nickel plated because the customer felt the nickel was to reflective in the field. On top of this the receiver sensitivity was improved and power consumption was reduced for both tx and rx thus reducing the size of the rx (3.5 x 3.75 x 1 inch) and tx (3.5 x 3 x .5 inches)

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

T207-a
