Overall Length:

7.800 inches

Overall Height:

2.397 inches

Overall Width:

5.030 inches

Component Type And Quantity:

2 bracket and 4 capacitor and 2 connector and 4 fastener and 2 handle and 1 printed wiring board and 2 relay and 21 resistor and 1 transformer

Special Features:

Major components and quantity: semiconductor device, diode 10; test point 6; mounting method and configuration: fastener, four on 4.000 inch by 5.750 inch

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A51110
