Overall Length:

8.187 inches

Overall Height:

0.062 inches

Overall Width:

5.187 inches

Component Type And Quantity:

6 capacitor and 4 choke and 24 resistor

Special Features:

Major components and quantity: printed circuit board 1; shield, tube 4; socket, tube 4; mounting method and configuration: screw, ten 0.154 inch diameter holes arranged 2.500 inch center to center along ends and 2.500 inch center to center along sides with centerlines of holes along ends and sides on 5.000 inch by 7.500 inch centers

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A51110
