End Application:

An/fps-115

Component Type And Quantity:

37 backshell and 1 coil and 1 connector and 1 diode and 29 microcircuit and 5 terminal

Special Features:

Major components: electronic component assembly 1; integrated circuit 42; usage design: buffer register

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A51110
