Operating Temperature Range:

-40.0/+55.0 degrees celsius

End Application:

5840-01-276-9398, radar set, an/tps-75

Features Provided:

Electrostatic sensitive

Special Features:

Storage temp range: m68.0/p71.0 degrees c; electroluminescent display unit is a self-contained assembly which provides necessary drive and display electronics to produce images formed by arrays of illuminated dots; a 32x16 element matrix touch sensor panel and asso.Electronics is an integral part of eldu hardware; display terminals includes front bezel, el panel, emi contrast enhancing filter, touch sensor matrix, terminal controller cca and power supply cca; 25 vdc input, 1.7 amp; 11.156 in.L; 7.530 in.W; 3.730 in.H;

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A506z0
