End Application:

An/tps-5 (v) 1

General Description:

Generates linear freq. Modulated wavvforms and timing signals; accepts if signal inputs from receiver channels; provides pulse compression equalized weighting, clutter and target decision logic; processes analog rf signals andreceiver signals into monopulse data and target indication data for data processing group

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
