## NSN 5840-01-337-3590

Radar Set - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/5840-01-337-3590
Ac Voltage Rating:
Between 120.0 volts and 208.0 volts
Frequency Rating:
60.0 hertz
End Application:
Radar system, an/fps-11 (v)
Joint Electronics Type Designation System Item Name:
Radar system
Joint Electronics Type Designation System Item Type Number:
An/fps-11 (v) 4
Electrical Power Source Relationship:
Operating
Transmitted Signal Frequency Rating:
Between 1000.0 megahertz and 2000.0 megahertz
Received Signal Frequency Rating:
Between 1000.0 megahertz and 2000.0 megahertz
Installation Design:
Fixed
Phase:
Three
Special Features:
A minimally attended radar (mar) that is a frequency agile I-band radar with an array antenna that electronically phase scans a pencil beam
in elevation while continually rotating a 5 rpm to provide real-time tri-coordinate radar data and beacon replies on all targets within the
surveillance volume
Functional Description:
Wprovides information to meet the following reqmts: long range detection of and height information on all friendly, hostile, or unidentified
aircraft; control capabilities for identification, air defense, tactical air control for close air support, counter-air operations for tactical fighter
interceptor aircraft, and military airlift; routine and emergency navigational assistance for all military and civilian aircraft operating within the
surveillance area of the designated air space; sufficient accuracy of position and altitude information associated with each detected aircraft
to permit employment of existing manned interceptor aircraft; sufficient internal performance monitoring and fault isolation to support the
minimal manning concept
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
Yes - demil/mli
Fiig:
T208-a
