End Application:

Mini mutes, remote emitter uni (reu h), an/mst-t1(v)

Special Features:

Part of the rf section in transmitter 28; provides low power signal conditioning to the twt amplifier; signal scan modulation is performed and a manual attenuator allows for pre-amplification gain control; low power signal sampling for status and control is also done

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A51110
