Overall Length:

11.400 inches

Overall Width:

2.220 inches

End Application:

Canadian coastal radar, cage 03538

Electrical Power Source Relationship:

Operating

Received Signal Frequency Rating:

Between 1215.0 megahertz and 1400.0 megahertz

Receiver Band Quantity:

1

Receiver Channel Quantity:

1

Special Features:

Parts list inc. Amplifier (3); attenuator (4); dummy load (1); connector (1); adapter (2); filter (1); isolator (2); divider (1); capacitor (2); microcircuit (1); cable assembly (15); mixer (1); tuner (1); harness assembly (1)

Functional Description:

Receiver-amplifier

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T208-a
