Special Features:

Transceiver module: frequency and modulation 9410mhz +/-30mhz (x band) p0n, peak output power 4kw , modulator fet switching method, intermediate frequency 60mhz, tuning automatic or manual, receiver front end mic (microwave ic), bandwidth tx pulselength 0.08us and 0.3us: 25mhz tx pulselength 0.8us: 3mhz; scanner unit: radiator printed waveguide array, polarization horizontal, antenna rotation 24rpm , radiator length 60cm, horizontal beamwidth 3.9 deg, vertical beamwidth 20 deg

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T208-a
