Overall Length:

12.3000 inches

Overall Width:

3.000 inches

Frequency Rating:

Between 9.2 gigahertz and 9.5 gigahertz

End Application:

Pathfinder3

Electrical Power Source Relationship:

Operating

Internal Battery Accommodation:

Not included

Installation Design:

Seaborne

Guard Channel:

Not included

Special Features:

Enhances radar returns with 12 intense blips, whereby the first blip represents the start; exclusiveacr test mode for visual and audible feedback; water proof to 10 meters; requires lithium battery; 96 hour operational life in stand by mode in excess of 8 hours in operational mode; worldwide certificationand complies with imo/gmdss; approved by uscg and med

Functional Description:

Transmit unique signals to passing ships

Type/model Designation:

Acr2714sart

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T199-d
