Ac Voltage Rating:

115.0 volts

Dc Voltage Rating:

26.5 volts

Frequency Rating:

400.0 hertz

Joint Electronics Type Designation System Item Name:

An/apn-59 (v)

Joint Electronics Type Designation System Item Type Number:

Radar set

Electrical Power Source Relationship:

Operating

Installation Design:

Airborne

Phase:

Single

Special Features:

Radar data presented on ppi display with range scales from 3-240 nautical miles

Functional Description:

X-band, airborne radar designed as navigational aid, includes capabilities for ground mapping, weather assessment, x-band transponder (beacon) operation

Reference Data And Literature:

T.O.12p5-2apn59-34

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T208-a
