End Application:

E-3a awacs aircraft

Functional Description:

Operates in a sealed chamber pressurized w/sulfur hexafluoride (sf6) gas; cools electronic equipment in chamber by removing energy from sf6 gas circulated through chamber and transferring the energy to an external heatsink

Fsc Application Data:

An/apy-1

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
